No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1989 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 269

NUMBER 1, FEBRUARY 15, 1989

INVITED PAPER

- Functional Reconstitution of Prokaryote and Eukaryote Membrane Proteins
Peter C. Maloney and Suresh V. Ambudkar 1

COMMUNICATIONS

- Prostaglandin E₂ and α_2 Adrenoceptor Agonists Inhibit the Pentose Phosphate Shunt in Pancreatic Islets
Suzanne G. Laychock 354
- Dusts Causing Pneumoconiosis Generate $\cdot\text{OH}$ and Produce Hemolysis by Acting as Fenton Catalysts
Thomas P. Kennedy, Ronald Dodson, N. V. Rao, Henry Ky, Christopher Hopkins, Michael Baser, Elizabeth Tolley, and John R. Hoidal 359
- Glucocorticoids Activate a Suicide Process in Thymocytes through an Elevation of Cytosolic Ca²⁺ Concentration
David J. McConkey, Pierluigi Nicotera, Pia Hartzell, Giorgio Bellomo, Andrew H. Wyllie, and Sten Orrenius 365

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

- Dichlorobenzidine-DNA Binding Catalyzed by Peroxidative Activation in *Salmonella typhimurium*
Lillian S. DeBruin and P. David Josephy 25
- Peroxidase-Mediated Formation of Glutathione Conjugates from Polycyclic Aromatic Dihydrodiols and Insecticides
Gary L. Foureman and Thomas E. Eling 55
- Effects of Vanadate on the Oxidation of NADH by Xanthine Oxidase
Stefan Liochev, Ekaterina Ivancheva, and Irwin Fridovich 188

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

- Oxidation of Aldehydic Products of Lipid Peroxidation by Rat Liver Microsomal Aldehyde Dehydrogenase
David Y. Mitchell and Dennis R. Petersen 11
- Sulfaquinoxaline Inhibition of Vitamin K Epoxide and Quinone Reductase
Peter C. Preusch, Susan E. Hazelett, and Kristine K. Lemasters 18
- Inactivation of Human Arginine-143, Lysine-143, and Isoleucine-143 Cu,Zn Superoxide Dismutases by Hydrogen Peroxide: Multiple Mechanisms for Inactivation
Pamela J. Horton, C. L. Borders, Jr., and Wayne F. Beyer, Jr. 114
- Rat Liver ATP-Sulfurylase: Purification, Kinetic Characterization, and Interaction with Arsenate, Selenate, Phosphate, and Other Inorganic Oxyanions
Meng Yu, Robert L. Martin, Sarita Jain, Lee J. Chen, and Irwin H. Segel 156
- Lipoxygenase Isoenzymes: A Spectroscopic and Structural Characterization of Soybean Seed Enzymes
James E. Draheim, Richard T. Carroll, Thomas B. McNemar, William R. Dunham, Richard H. Sands, and Max O. Funk, Jr. 208

- Disruption of Rat Hepatic Microsomal Electron Transport Chains by the Selenium-Containing Anti-inflammatory Agent Ebselen
Mahmoud N. Nagi, Juan C. Laguna, Lynda Cook, and Dominick L. Cinti 264
- Action of Ebselen on Rat Hepatic Microsomal Enzyme-Catalyzed Fatty Acid Chain Elongation, Desaturation, and Drug Biotransformation
Juan C. Laguna, Mahmoud N. Nagi, Lynda Cook, and Dominick L. Cinti 272
- Monoterpene Biosynthesis: Mechanism and Stereochemistry of the Enzymatic Cyclization of Geranyl Pyrophosphate to (+)-*cis*- and (+)-*trans*-Sabinene Hydrate
Terrence W. Hallahan and Rodney Croteau 313

GLYCOPROTEINS AND GLYCOLIPIDS

- Molecular and Immunologic Differences in Canine Fibronectins from Articular Cartilage and Plasma
Nancy Burton-Wurster and George Lust 32
- Identification of the Precursor Protein for the Heparan Sulfate Proteoglycan of Human Colon Carcinoma Cells and Its Post-translational Modifications
Renato V. Iozzo and John R. Hassell 239

HORMONE STRUCTURE AND FUNCTION

- Placental Keratinocyte Growth Factor: Partial Purification and Comparison with Epidermal Growth Factor
Marie L. Chiu and Edward J. O'Keefe 75

LIPIDS AND LIPID MEDIATORS: METABOLISM, REGULATION, AND FUNCTION

- In Vitro* Stimulation of Rat Liver Retinyl Ester Hydrolase by Ethanol
Howard Friedman, Sohrab Mobarhan, Jordan Hupert, Debbie Lucchesi, Cynthia Henderson, Patricia Langenberg, and Thomas J. Layden 69
- Identification of Regulatory Sites in the Biosynthesis of Ubiquinone in the Perfused Rat Heart
Toshinori Yamamoto, Shun-Ichi Shimizu, Hiromi Sugawara, Kazutaka Momose, and Harry Rudney 86

MEMBRANE TRANSPORT AND INTRACELLULAR SIGNALS

- Characterization of Phospholipase C-Mediated Polyphosphoinositide Hydrolysis in Rat Heart Ventricles
Dorie W. Schwartz and Jennifer Halverson 137
- Inhibition and Labeling of Sodium, Potassium ATPase by the Dialdehyde Derivative of ATP
Wayne P. Schraw and Robert L. Post 327
- Diacylglycerol Generation and Phosphoinositide Turnover in Human Neutrophils: Effects of Particulate versus Soluble Stimuli
David N. Burnham, Shiv Raj Tyagi, David J. Uhlinger, and J. David Lambeth 345

MOLECULAR BIOLOGY, GENE EXPRESSION AND DEVELOPMENTAL BIOCHEMISTRY

- Glucocorticoid Regulation of the Rat Cytochrome P450c (P450IA1) Gene: Receptor Binding within Intron I
J. Michael Mathis, William H. Houser, Edward Bresnick, John A. Cidlowski, Ronald N. Hines, Russell A. Prough, and Evan R. Simpson 93
- Molecular Cloning and Analysis of Full-Length cDNAs Cognate to a Rat Gene under Multihormonal Control
Kai-Lin Lee, Anthony Makkinje, Lan-Yang Ch'ang, and Francis T. Kenney 106

Abundance of mRNAs Encoding Urea Cycle Enzymes in Fetal and Neonatal Mouse Liver	
<i>Sidney M. Morris, Jr., Diane M. Kepka, William E. Sweeney, Jr., and Ellis D. Avner</i>	175
Prothymosin α and Parathymosin: mRNA and Polypeptide Levels in Rodent Tissues	
<i>M. Clinton, M. Frangou-Lazaridis, C. Panneerselvam, and B. L. Horecker</i>	256

OXYGENASES, MICROSOMES, AND P450 REACTIONS

Metabolism of Retinol and Retinoic Acid by Human Liver Cytochrome P450IIC8	
<i>Maria Anna Leo, Jerome M. Lasker, Judy L. Raucy, Cho-Il Kim, Martin Black, and Charles S. Lieber</i>	305

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

Actin Filament Capping and Cleaving Activity of Cytochalasins B, D, E, and H	
<i>Else Urbanik and Bennie R. Ware</i>	181
Raman Spectroscopic Evidence for a Disulfide Bridge in Calf γ_{II} Crystallin	
<i>Jayanti Pande, Martin J. McDermott, Robert H. Callender, and Abraham Spector</i>	250

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

Pyruvate Kinase Isozymes from the Green Alga, <i>Selenastrum minutum</i> . I. Purification and Physical and Immunological Characterization	
<i>Min Lin, David H. Turpin, and William C. Plaxton</i>	219
Pyruvate Kinase Isozymes from the Green Alga, <i>Selenastrum minutum</i> . II. Kinetic and Regulatory Properties	
<i>Min Lin, David H. Turpin, and William C. Plaxton</i>	228

PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING

Substrate Specificity and Inhibitors of a Capillary Injury-Related Protease from Sheep Lung Lymph	
<i>Marian Orlowski, Marvin Lesser, Julia Ayala, Abraham Lasdun, Chih-Min Kam, and James C. Powers</i>	125

PROTEIN STRUCTURE AND FUNCTION

Properties of the Interaction between Phosphofructokinase and Actin	
<i>Susan J. Roberts and George N. Somero</i>	284
The Molecular Weight and Oligomerization of Rabbit Thrombomodulin as Assessed by Sedimentation Equilibrium	
<i>Paul T. Winnard, Charles T. Esmon, and Thomas M. Laue</i>	339

REGULATION OF METABOLISM AND OF ENZYME ACTION

Regulation of <i>Chlorella</i> Nitrate Reductase: Control of Enzyme Activity and Immunoreactive Protein Levels by Ammonia	
<i>Kathryn G. Zeiler and Larry P. Solomonson</i>	46
Identification of Zn^{2+} -Dependent and Mg^{2+} /Triton X-100-Dependent Tyrosine Protein Kinases in Ethylenediaminetetraacetate-Treated P_2 Membrane Fraction of Monkey Brain Basal Ganglia	
<i>Sammanda Ramamoorthy and Aiylam S. Balasubramanian</i>	148

Glyceraldehyde Phosphate: An Insulin Secretagogue with Possible Effects on Inositol Phosphate Formation in Pancreatic Islets	
<i>Michael J. MacDonald, Robert J. Mertz, and Rajendra S. Rana</i>	194
Inhibition of Pyruvate Carboxylase by Sequestration of Coenzyme A with Sodium Benzoate	
<i>Ann D. Griffith, Douglas M. Cyr, Sharon G. Egan, and George C. Tremblay</i>	201
Molecular Cloning of Salicylate Hydroxylase Genes from <i>Pseudomonas cepacia</i> and <i>Pseudomonas putida</i>	
<i>Youngsoo Kim and Shiao-Chun Tu</i>	295

NUMBER 2, MARCH 1989

INVITED PAPER

Interaction of Folylpolyglutamates with Enzymes in One-Carbon Metabolism	
<i>Verne Schirch and William B. Strong</i>	371

COMMUNICATIONS

Progesterone Induces Transient Changes in Plasma Membrane Fluidity of Amphibian Oocytes during the First Meiotic Division	
<i>Gene A. Morrill, Kei Doi, and Adele B. Kostellow</i>	690
Coidentity of Putative Amylase Inhibitors from Barley and Finger Millet with Phospholipid Transfer Proteins Inferred from Amino Acid Sequence Homology	
<i>Werner R. Bernhard and Chris R. Somerville</i>	695

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

<i>tert</i> -Butyl Hydroperoxide Kills Cultured Hepatocytes by Peroxidizing Membrane Lipids	
<i>Naohiko Masaki, Marlene E. Kyle, and John L. Farber</i>	390
Alloxan- and Glutathione-Dependent Ferritin Iron Release and Lipid Peroxidation	
<i>David W. Reif, Victor M. Samokyszyn, Dennis M. Miller, and Steven D. Aust</i>	407
Nuclear Membrane Lipid Peroxidation Products Bind to Nuclear Macromolecules	
<i>Carlos E. Vaca and Mats Harms-Ringdahl</i>	548
Temperature Dependence of the Microsomal Oxidation of Ethanol by Cytochrome P450 and Hydroxyl Radical-Dependent Reactions	
<i>Susana Puntarulo and Arthur I. Cederbaum</i>	569
Generation of Hydrogen Peroxide by Brain Mitochondria: The Effect of Reoxygenation following Postdecapitative Ischemia	
<i>Maria Cino and Rolando F. Del Maestro</i>	623

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Free Radical Intermediates during Peroxidase Oxidation of 2- <i>t</i> -Butyl-4-methoxyphenol, 2,6-Di- <i>t</i> -butyl-4-methylphenol, and Related Phenol Compounds	
<i>Massimo Valoti, Herbert J. Sipe, Jr., Giampietro Sgaragli, and Ronald P. Mason</i>	423
Monoterpene Biosynthesis: Mechanistic Evaluation of the Geranyl Pyrophosphate:(-)- <i>endo</i> -Fenchol Cyclase from Fennel (<i>Foeniculum vulgare</i>)	
<i>Rodney Croteau, John H. Miyazaki, and Carl J. Wheeler</i>	507
Essential Histidine Residues in Lysolecithin:Lysolecithin Acyltransferase from Rabbit Lung	
<i>Jesús Pérez-Gil, Julio Martín, Carmen Acebal, and Roberto Arche</i>	562

- Stereoselective Ligand Interactions of Chicken Liver Phosphoenolpyruvate Carboxykinase with Fluorophosphoenolpyruvate
Seung Hee Hwang and Thomas Nowak 646

GLYCOPROTEINS AND GLYCOLIPIDS

- Structural Studies of the Asparagine-Linked Sugar Chains of Two Immunoglobulin M's Purified from a Patient with Waldenström's Macroglobulinemia
Hirokazu Ohbayashi, Tamao Endo, Edith Mihaesco, Mercedes G. Gonzales, Naohisa Kochibe, and Akira Kobata 463
- In Vivo* Turnover of the Basement Membrane and Other Heparan Sulfate Proteoglycans of Rat Glomerulus
Lesley A. Beavan, Malcolm Davies, John R. Couchman, Michael A. Williams, and Roger M. Mason 576
- Structural and Immunochemical Analysis of Three α -Limit Dextrin Oligosaccharides
Johan Kumlien, Gunnar Grönberg, Bo Nilsson, Olle Månsson, David Zopf, and Arne Lundblad 678

LIPIDS AND LIPID MEDIATORS: METABOLISM, REGULATION, AND FUNCTION

- Directed Biosynthesis of Avermectins
Tom S. Chen, Edward S. Inamine, Otto D. Hensens, Deborah Zink, and D. A. Ostlund 544
- Effects of Eicosapentaenoic and Docosahexaenoic Acid Supplements on Phospholipid Composition and Plasmalogen Biosynthesis in P388D₁ Cells
Merle L. Blank, Zigrida L. Smith, Y. Joseph Lee, and Fred Snyder 603

MEMBRANE TRANSPORT AND INTRACELLULAR SIGNALS

- Transverse Tubule Calcium Regulation in Malignant Hyperthermia
James M. Ervasti, James R. Mickelson, and Charles F. Louis 497
- Decreased Activity of the Pyruvate Translocator and Changes in the Lipid Composition in Heart Mitochondria from Hypothyroid Rats
Giuseppe Paradies and Francesca Maria Ruggiero 595

MEMBRANES, CELL SURFACES, AND RECEPTORS

- Role of Carboxyl Residues and Membrane Lipids in Cation Binding to Bacteriorhodopsin
Eva Hrabeta-Robinson, Marco Semadeni, and Lester Packer 476

NEUROSCIENCES

- Purification and Characterization of a Galactoside-Binding Lectin from Human Brain
Dominique Bladier, Raymonde Joubert, Virginia Avellana-Adalid, Jean-Louis Kémény, Christian Doinel, Jacques Amouroux, and Michel Caron 433

OXYGENASES, MICROSOMES, AND P450 REACTIONS

- Expression of a cDNA Encoding a Rat Liver Glutathione S-Transferase Ya Subunit in *Escherichia coli*
Regina W. Wang, Cecil B. Pickett, and Anthony Y. H. Lu 536

- Monoclonal Antibody-Directed Characterization of Rat Hepatic P450 Catalyzing the ω -1 and ω -2 Hydroxylation of Prostaglandins
Karsten A. Holm, Sang S. Park, Harry V. Gelboin, and David Kupfer 664

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

- Effect of Shear Stress and Free Radicals Induced by Ultrasound on Erythrocytes
Takashi Kondo, Yasunori Fukushima, Hideo Kon, and Peter Riesz 381
- Mussel Glue Protein Has an Open Conformation
Taffy Williams, Keishi Marumo, J. Herbert Waite, and Robert W. Henkens 415

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

- Formation of *trans*-Caffeoyl-CoA from *trans*-4-Coumaroyl-CoA by Zn^{2+} -Dependent Enzymes in Cultured Plant Cells and Its Activation by an Elicitor-Induced pH Shift
Richard E. Kneusel, Ulrich Matern, and Klaas Nicolay 455
- Regulatory Seryl-Phosphorylation of C_4 Phosphoenolpyruvate Carboxylase by a Soluble Protein Kinase from Maize Leaves
Jin-An Jiao and Raymond Chollet 526

PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING

- Escherichia coli*-Derived Human Interferon- γ with Cys-Tyr-Cys at the N-Terminus Is Partially N^{α} -Acylated
Susumu Honda, Tsuneo Asano, Tomoko Kajio, and Osamu Nishimura 612

PROTEIN STRUCTURE AND FUNCTION

- Dissociation of Ferritins
Maria C. Linder, Hamid R. Kakavandi, Philip Miller, Patricia L. Wirth, and Glenn M. Nagel 485
- Rat Brain Hexokinase: Further Studies on the Specificity of the Hexose and Hexose 6-Phosphate Binding Sites
John E. Wilson and Vincent Chung 517
- Evidence for Vicinal Thiols and Their Functional Role in Glucosamine-6-phosphate Deaminase from *Escherichia coli*
Myriam M. Altamirano, Carlos A. Libreros-Minotta, Roberto Lara-Lemus, and Mario Calcagno 555
- Active-Site Modification of Superoxide Dismutase by H_2O_2 Studied through 1H NMR of the Cobalt Derivatives
I. Bertini, C. Luchinat, M. S. Viezzoli, and Y. Wang 586
- Purification of Phospholamban from Bovine Cardiac Muscle with Organic Solvents
P. Boyot, B. Luu, L. R. Jones, and E. Trifilieff 639

REGULATION OF METABOLISM AND OF ENZYME ACTION

- Effect of Esters of Succinic Acid and Other Citric Acid Cycle Intermediates on Insulin Release and Inositol Phosphate Formation by Pancreatic Islets
Michael J. MacDonald, Leonard A. Fahien, Robert J. Mertz, and Rajendra S. Rana 400
- Independent Regulation of Pyruvate Kinase Expression by Cyclic AMP and Prostaglandin $F_{2\alpha}$ in Mouse Mastocytoma Cells
Julie-Lani Ngo and Kenneth H. Ibsen 440

ANNOUNCEMENT

Walter J. Johnson Prize

For the Encouragement of Postdoctoral Research

The Board of Directors of Harcourt Brace Jovanovich, Inc., has established the Walter J. Johnson Prize to be awarded to a deserving individual or individuals having recently completed doctoral studies in the life sciences. The award was established in recognition of Mr. Walter J. Johnson, founder of Academic Press (a division of Harcourt Brace Jovanovich), who has engaged in a lifelong dedication to excellence in scientific publishing. The editorial administrators of three Academic Press journals have been vested with the authority to select the recipients of the Walter J. Johnson Annual Prize: *Archives of Biochemistry and Biophysics*, *Experimental Cell Research*, and *Journal of Molecular Biology*.

A prize of \$10,000 will be awarded by the Editorial Committee of *Archives of Biochemistry and Biophysics* every three years (next in the spring of 1990) to one or more individuals who have recently completed their doctoral studies in the life sciences.

The following guidelines will apply in the selection of recipients of this award:

1. The nomination should be based on the quality of a paper published in *Archives of Biochemistry and Biophysics* during the preceding three years. The nominee must have been the first-listed author.

2. The nominee should have received his/her Ph.D. or M.D. no more than five years prior to the publication date of the article.

3. The Prize may be awarded to one nominee or divided among several nominees.

4. Nominations should be made in writing to the Chairman of the Editorial Committee by a member of the Editorial Board of *Archives of Biochemistry and Biophysics*. Nominations must be submitted by December 31, 1989.

5. Selection will be made by a Committee of Executive Editors of *Archives of Biochemistry and Biophysics*.

6. Awards will be presented next in the spring of 1990 during the dinner meeting of the Editorial Board of *Archives of Biochemistry and Biophysics* held during the Annual Meeting of the ASBMB.

Instructions to Authors¹

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Short Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Short Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors may send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Gene sequences should be simultaneously submitted to a gene databank. Authors of papers describing new structure determinations are requested to submit to the Protein Data Bank all of the structural data required to validate the discussion, including both x-ray amplitudes and phases and the advised atomic coordinates.

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the coauthors of the manuscript prior to its submission to the journal.*** Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

¹ An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUB rules and recommendations, and accepted abbreviations.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet; footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. They should be planned to fit the proportion of the printed page (5.5 × 8 in.; column width, 2.6 in.) and submitted no larger than 8.5 × 11 in. Lettering on drawings should be of professional quality or generated by *high-resolution* computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with India ink on tracing linen, smooth surface white paper, or Bristol board. Alternatively, *high-quality* computer graphics may be acceptable. Graph paper, if used, should be ruled in blue. Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1985. Please note the following examples.

1. KISS, Z., DELI, E., AND KUO, J. F. (1988) *Arch. Biochem. Biophys.* **265**, 38–42.
2. STEIN, W. D. (1986) *Transport and Diffusion across Cell Membranes*, Academic Press, San Diego, CA.
3. MAGNANI, J. L., SPITALNIK, S. L., AND GINSBURG, V. (1987) in *Methods in Enzymology* (Ginsburg, V., Ed.), Vol. 138, pp. 195–207, Academic Press, San Diego, CA.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
